PERSONAL PROJECTS

AT&T - OBATS (06/2017 – 07/2018)

- Creating technical requirements based on business requirements provided by client.
- Interact with clients to elicit architectural and non-functional requirements like performance, scalability, reliability, availability, maintainability.
- Learned new automation tool Jenkins as continuous integration tool which helps in automation of build creations, testing and code validations.

AT&T - CNBE (05/2014 – 06/2017)

- Develop code based on predefined client standards.
- Conducting self-reviews of Code using the Infosys proprietary code review checklists and procedures.
- Design applications based on identified architecture and support implementation of design by resolving complex technical issues faced by the IT project team during development, deployment and support.

Capital One - RTM (06/2013 – 04/2014)

- Conducting self-reviews of Code using the Infosys proprietary code review checklists and procedures.
- Doing the impact analysis of the new requirements / change in requirements during the post-production period and suggest the impact on the existing systems.
- Analyze and resolve any issues reported by the client or the users in the system, coordinate with interfacing applications.

ACHIEVEMENTS

Certificate of Appreciation (2017)

I got this award due my excellent work on researching & implementing the best solution according to our project requirement.

Best Team (2015)

We got this award as we provided the best project solution under whole whole ECSADM account.
